ABOUT THE CONFERENCE

Women have been as vital in the history. Without active participation of women the Socio-economic or political progress of a country will deteriorate. Traditionally Indian women had been home makers. But in the recent decades, education and awareness, has made them to go out and choose careers.

it is generally perceived that gender bias against working women starts right from the stage of recruitment. Their capabilities are generally underestimated. Society has started seeing women in a different perspective. They work as lawyers, nurses, doctors, social workers, teachers, secretaries, managers and officers etc. There are innumerable challenge and problems faced by them both at home and workplace. As per recent research, a large number of women workers face emotional and mental disorders. Women working in some industries, factories, banks, hospitals do not get time to care their babies. The efficiency of a working woman is always suspected and questioned by their male counterparts. The Conference aims at finding out the challenges in the Workplaces which pose problems for them, and what are those particular challenges that women face working in the various sectors.
